Middleby Marshall Introduces PS640 Green WOW! Oven

--Operators will use less energy while having the fastest cook time on the market--

ELGIN, Ill. (July 16, 2008) —Middleby Marshall introduces its newest conveyor oven technology focused on energy savings, the PS640 Green WOW! Oven.

With patented Middleby Marshall technology, the oven is 35% faster and 30% more energy efficient than prior models of this size. The space savings platform of the PS640 Green WOW! Oven has a 40” bake chamber.

“Operators will immediately see their energy bills go down when using the Green WOW! Oven with the Middleby Marshall patented energy eye and motor sleep mode technology,” said Middleby Marshall President Mark Sieron. “Not only is this oven environmentally friendly and economical to use, it has the fastest cooking speed in conveyor oven technology available on the market today with most product cooking fully in three minutes.

Operators can calculate their actual energy savings and increased pie per hour cooking capacity at www.wowoven.com.” More than 2,500 WOW! Ovens have been sold since the introduction of the conveyor.

Middleby Marshall is the world leader in conveyor ovens. More than 2 million pizzas are cooked every day on Middleby Marshall ovens around the world. For more information visit www.middleby-marshall.com or www.wowoven.com.
