Middleby Marshall® *Service Bulletin*

SUBJECT

Update to Service Bulletin MM-177, *Availability of Conveyor Speed Controller Kits*

GENERAL

INFORMATION FROM SERVICE BULLETIN MM-177

Service Bulletin MM-177 described the availability of the new Speed Controller with Digital Display (Kit P/N 37337) and its separately-available Display Unit (P/N 37503). This Service Bulletin provides additional information on these parts.

As mentioned in Bulletin MM-177:

- Kit P/N 37337 should be ordered for stock instead of Kit P/N 42810-0133 (Kit, Controller + Thumbwheel).
- P/N 37503 should be ordered for stock instead of P/N 42810-0118 (Thumbwheel Only).
- All Middleby ovens EXCEPT the PS200R68-series are compatible with these new parts. PS200R68-series ovens can ONLY use the thumbwheel-type speed controllers; so, whenever possible, these obsolete parts should be saved for use with these oven models only.

NEW INFORMATION

In addition to these issues, here is some additional information on the new Speed Controllers:

- The new speed controller ONLY replaces the thumbwheel-type speed controller. It CANNOT be used to replace the dial-type controller with digital display (P/N 28074-0022) that is used in PS360/360WB tandem, tri-cavity, and quad-cavity ovens.
- The new digital display, P/N 37503, can ONLY be used with the control module included in the new Conveyor Speed Controller kit (P/N 37337). It CANNOT be used with the control module from the original thumbwheel unit. So, if an oven would normally require only the thumbwheel to be replaced, you should instead use Kit P/N 37337 and replace the entire control module and display.
- As the new display unit, P/N 37503, is compatible only with the new controller, your demand for this part will initially be less than your existing demand for the thumbwheel, P/N 42810-0118. Your order quantities should reflect this reduced demand.
- Pricing information for the parts is provided below.
P/N 37337 (Complete kit): List \$314.86
P/N 37503 (Display only): List \$112.80
